X = available; -- = not available.

NOTE: This table presents all available outcomes available on the interactive NSDUH substate estimates website and the years they can be displayed, assuming no changes to the substate region definitions. If the substate region definitions are unchanged, reasons for an outcome not being available in a particular time period include 1) no substate estimate was produced, 2) no outcome data were collected in the survey, 3) the estimate was suppressed due to low precision, or 4) the outcome is not comparable due to methodological changes. For example, the past year nonmedical use of pain reliever outcome is not comparable between 2002-2014 and 2015-2018 because the pain reliever questions were revised beginning in 2015; so, the 2014-2016 data point for that outcome will be missing.

<sup>1</sup> For these outcomes, the 2016-2018 small area estimates are not comparable with the 2012-2014 estimates or the estimates from prior years. Because of comparability issues, 2014-2016 small area estimates were not produced for these outcomes. Prior to 2016-2018, "misuse of pain relievers" was referred to as "nonmedical use of pain relievers."
